PROFILE SUMMARY

Product Manager (CSPO) with 3.8+ years of experience building SaaS and E-Commerce products from zero to launch. Skilled in product discovery, UI/UX research, PRD writing, roadmap planning, API design, SQL, and testing. Delivering customer-centric products, collaborating with engineering and design teams, and driving measurable impact.

Core Capability:

Product Discovery & Customer Research | UI/UX Research | Usability Testing | PRD Writing & Roadmap Planning | API Integration & Database Design | SQL & Data-Driven Decision | Agile & Scrum Execution | Stakeholder Communication & Cross-Functional Collaboration | Stakeholder Alignment | GTM Planning | JIRA, Asana, Figma, PowerBI, Postman, Linux, Excel

PROFESSIONAL EXPERIENCE

Product Manager 08/2025 - 11/2025
SayaCare Private Limited Noida

- Facilitated weekly stakeholder syncs to prioritize features and manage trade-offs between UX and technical complexity.
- Redesigned the Payment & Refund System to eliminate manual intervention, indexing databases for performance gains.
- Redesigned - Categories Page, Cart Page, Prescription System, Health Profiling System for both [website](#) and [app](#).
- Authored PRDs, improved API clarity for developers, and helped identify DB table issues that reduced the refund process.
- Led functional App and Website testing to ensure zero regression at launch.

Product Lead 03/2024 - 08/2025
DigitalGoWhere Private Limited Gurgaon

- Directed the end-to-end development of Emission SaaS products, writing detailed PRDs, defining API contracts with developers, and designing scalable database schemas, resulting in 230K grams of carbon reduction.
- Launched and managed internal products such as [Bee Sustainable](#) and [BoostUp](#), leading cross-functional collaboration across design, backend, and frontend teams to align UX, automation, and business goals into cohesive product experiences.
- Partnered with 5 developers and 2 designers to deliver 9 major product releases ahead of schedule, overseeing API integration flows, database optimization, and QA testing.
- Built a full-scale LMS system from scratch, integrating AI-based Voice/Face Cloning, admin dashboards, and progress tracking, now used internally for onboarding and training, reducing onboarding time.
- Conducted Customer Research and product testing to shape feature roadmap and increase feature adoption.

Technical Program Manager 02/2023 - 03/2024
Chargeup Solutions Private Limited Gurgaon

- Owned the product vision and roadmap for Chargeup's EV operations suite ([Partner App](#) and [Track App](#)) writing comprehensive PRDs, defining feature specifications, and coordinating API contracts and data models.
- Conducted 20+ user interviews with drivers and field staff to inform discovery and backlog prioritization
- Defined and tracked KPIs including DAU/MAU, service TAT, and FE performance. Used data to drive iterative releases, cutting battery replacement turnaround from 27 to 21 hours.
- Collaborated closely with backend developers on API architecture and data flows, and partnered with design teams to improve user journeys and streamline UX flows across both apps.
- Launched an Automation-Powered Learning Management System (LMS) with personalized learning paths; improved FE onboarding speed, by transferring domain specific knowledge within 3-7 days.

Project Manager (Internship) 09/2021 - 02/2022
Quixy Technologies LLC Hyderabad

- Led UX optimization for [Quixy's No-Code SaaS platform](#) by driving end-to-end UI/UX overhauls based on customer feedback and usage analytics, reduced bounce rate and improved session duration.
- Introduced structured user feedback loops via moderated usability testing, increasing UI scores in post-launch surveys.
- Developed an internal LMS-style knowledge-sharing and documentation workflow to streamline communication between engineering and cross-functional teams, reduced clarification time and improved feature delivery alignment.

PROFESSIONAL CERTIFICATIONS

Certified Scrum Product Owner (CSPO) 2024-2026
Google Project Management Certificate May 2024
Google Cloud Product Manager Jul 2024
Google Agile Project Certificate May 2024
Machine Learning: Python + R Feb 2024
SQL BootCamp Jun 2023

MAJOR REWARD & RECOGNITION

- Winner, All India Smart Hackathon — Built an AI-powered Ayurvedic medical app that streamlined diagnosis and treatment plans by integrating traditional medicine with modern data science.
- We4Tech Winner — Created a machine learning model that predicted startup success probability using market signals, team profiles, and traction metrics.
